

## Certero for SaaS - Google Workspace Module

Manage your Google Workspace SaaS subscription more effectively: avoid Bill Shock, Cloud Sprawl, Shadow IT and Toxic Consumption

### Challenge

Without visibility of the Google Workspce estate, covering users, usage, storage consumption, licenses and costs, effectively managing the platform is almost impossible. For example, with no visibility of users and their licenses, when employees leave the organization their licenses are typically not re-harvested, which leads to the unnecessary purchase of new ones. Over time, this causes costs to spiral out of control as enterprises begin to collect unused licenses and costs.

While this example has direct cost implications, the general management of Google Workspace domains, users and activities is equally challenging. In almost all cases, the problems experienced by organizations stem from a lack of visibility across the Google Workspace estate.

### Key Features:

- Track Expenditure
- View User Activity
- View 2-Step Authentications
- Identify Available Licenses
- Identify Inactive Users
- Track Storage Consumption
- Identify Duplicate Licenses
- View Domains and Aliases

### Solution

With out-of-the-box automation, a single source of granular data and advanced analytics, Certero's Google Workspace module gives you single pane of glass visibility of your applications and full control over your use of Google Workspace and expenditure, as part of the world's most advanced and modern Cloud Asset Management solution.

Certero's Google Workspace license management and optimization module removes all of the problems associated with administering the platform, by giving you greater visibility of your domains, users, activities, licenses and costs all in one easy to manage location.

### Benefits

Certero for SaaS's Google Workspace license management and optimization module gives you the visibility you need to control your domains, users, activities, licenses and costs.

- Automate the consolidation of groups, users, activities, licenses, devices and costs data into one area
- Monitor login activity and status of users
- Visibility of all domains and aliases in one place
- Complete overview of the Google Workspace user-base
- Eliminate overspending on unused or oversubscribed licenses
- Track storage consumption per user
- Monitor 2-Step Authentication in one place
