Certero for SaaS - Microsoft 365 Module

Manage your Microsoft 365 SaaS subscription more effectively: avoid Bill Shock, Cloud Sprawl, Shadow IT and Toxic Consumption

Challenge

In many enterprises, the starters and leavers process is often poorly managed and can cause many issues for IT and other departments. Typically, leavers' hardware and software assets are not tracked properly and organizations waste a lot of money purchasing extra equipment for new starters, rather than re-harvesting existing assets. The same is true for SaaS solutions like Microsoft 365.

As organizations migrate to the cloud, many believe the days of license management are behind them. After all, you cannot be non-compliant with SaaS applications, right? However, while enterprises may not have to worry about licensing compliance, cloud subscriptions still need to be managed. Neglecting this responsibility can lead to spiraling costs that are often difficult to address.

Solution

Certero for SaaS Microsoft 365 license management and optimization module gives you greater visibility and control over your estate, so you can achieve real cost savings.

- Obtain detailed management reports
- Identify unallocated subscriptions
- Improve starters and leavers process
- Identify dormant mailboxes
- Identify dormant users
- Report on mailbox storage limits
- Identify products not activated or used
- Optimize subscription levels

Key Features:

- Optimize Subscriptions
- Manage All M365 Products
- Monitor Email Accounts
- Manage All Users
- Monitor One Drive Accounts
- Track Usage and Activity
- Identify Inactive Users
- Manages Storage Consumption

Benefits

Certero for SaaS Microsoft 365 license management and optimization solution gives you greater visibility and control to achieve real cost savings through subscription optimization.

- Automate the consolidation of user, subscription, activity and storage data into one area
- Improve visibility and accountability of starters and leavers processes
- Reduce the cost of unused and unallocated subscriptions
- Provide management and other decision makers with visibility of Microsoft 365 expenditure
- Identify and track storage consumption to manage potential cost increases
- Manage all cloud applications within Certero for SaaS, on the Certero Platform
