Certero for SaaS - Slack Module

Manage your Slack SaaS subscription more effectively: avoid Bill Shock, Cloud Sprawl, Shadow IT and Toxic Consumption

Challenge

Without visibility into the Slack estate, it becomes very difficult to manage users, subscriptions and costs effectively. For example, when an employee leaves the organization, these subscriptions are often overlooked and not re-harvested, leading to the unnecessary purchase of new ones. With detailed visibility into the users activity and collaboration with the organizations Active Directory, you can easily discover unused subscriptions or those improperly assigned.

Solution

With out-of-the-box automation, a single source of granular data and advanced analytics, Certero's Slack module gives you single pane of glass visibility of your applications and full control over your use of Slack and expenditure, as part of the world's most advanced and modern Cloud Asset Management solution.

Certero for SaaS's Slack license management and optimization module removes many of the problems associated with the administration of the license subscriptions. The solution gives you greater visibility into your subscribed users and their associated activity, the different Slack Teams and their members, Slack Groups as well as Slack Channels all in one easy to manage location.

o   Track Expenditure

o   View User Activity

o   Optimize subscriptions no longer in use

o   Visibility into Two-Step verification

o   Assist in managing users assigned to Teams or Groups

Benefits

Certero's Slack license management and optimization module gives you the visibility you need to control your subscribed users, Teams, Groups and Channels along with the associated subscription costs.

o   Automate the gathering of users, teams, groups, channels, subscriptions and costs data all into one area

o   Eliminate overspending on unused or improperly assigned subscriptions

o   Monitor the enablement of 2-Step verification for users

o   Monitor usage activity and status of subscribed users

o   Complete overview of the Slack user base

o   Collaboration with Active Directory to have visibility into the users username, department, title and location
